Hiring Manager

WalkingTree Technologies

Hyderabad

Subject: Application for Python Developer Role

Dear Hiring Manager,

I am writing to express my strong interest in the Python Developer position at [Company Name], as advertised. With hands-on experience in Python programming, software development principles, and a growing enthusiasm for Generative AI and Large Language Models (LLMs), I am eager to bring my technical expertise and problem-solving skills to your innovative team.

During my recent RISE Internship with Tamizhan Skills, I built several Python-based applications, including a Currency Converter App, Weather App using APIs, and a Rule-Based Chatbot, which allowed me to strengthen my coding skills and explore real-world problem-solving. Additionally, I have experience in RESTful API development, backend integration using Spring Boot, and database management (MySQL), which further aligns with the requirements of this role.

I am particularly drawn to WalkingTree Technologies because of its focus on emerging technologies like AI and LLMs, and I am keen to contribute by leveraging my Python skills while also expanding my knowledge in this domain. I believe my adaptability, collaborative mindset, and commitment to continuous learning would make me a valuable asset to your team.

I have attached my resume for your review. I would be delighted to discuss how my background and skills align with your requirements in greater detail.

Thank you for considering my application. I look forward to the opportunity to contribute to your team's success.

Sincerely,

Miryala Lavanya
